

# EARTHQUAKES—COMING CLOSER TOGETHER AND STRONGER

The following document is an important key to where we are in Bible prophecy. The LORD speaks of earthquakes in diverse places in the end times and I want to talk about my experience in tracking this information. For a decade Dina Kalmeta and I both have been doing end times news, and we have been tracking earthquakes that range from M5.0 and upwards. The trend for these have been periodically one, two, or three a month but come middle of May 2025, I began to notice something fantastic. Earthquakes were increasing to EVERY TWO OR THREE DAYS APART. As time goes on the earthquakes are getting both stronger and closer together. As the Bible says there will be in the end times leading up to the LORD's coming earthquakes in diverse places (and we are definitely seeing that) AND earthquakes coming closer together and stronger like birth pains (and we are for sure witnessing that). So if you believe the Bible, then this only has one expected conclusion, and the church better get ready because the signs are now coming fast....
